- 2) Remove the tape from the thread tails at one end (10cm tails) of six strings. Secure them with an over hand knot.

- 3) Tape the thread ends as in the picture. Separate the beaded strings into three groups, then braid them. (If it is tight to braid strings along the way, slide tape of each string at 1) to the thread ends little by little.)

Tape the thread ends to the table.

- 4) Make 40cm (1.3 ft.) of braided strings, then take some beads off from the thread tails to align the end of the braiding. Remove tape from each thread ends, then secure all of them. Glue the knots on both ends and cut off excess thread ends.
